ABOUT UTILE

The UTILE project (the EU-Health innovation marketplace) is funded by the European Commission under the European H2020 Research and Innovation Program and coordinated by PNO Consultants. UTILE analyses all finished Health projects within FP7 and H2020 and identifies the research results with the highest potential for further valorisation and exploitation. UTILE focuses on sustainable exploitation of the identified research results by early involvement of both demand (innovation developers) and supply (innovation providers) sides. The online marketplace encourages and promotes dialog and collaboration between innovation developers and innovation providers.

The valorisation platform for FP7 Health and H2020 SC1 research results

Are you involved in R&D, business development or commercialisation activities within the life sciences and health sector? Then read on, because we are developing an online marketplace which can facilitate your valorisation activities and help you broaden your network! The UTILE project is interesting for all players within the life sciences sector.

#1 VALIDATOR for innovation PROVIDERS

The road to commercialisation is full of challenges for researchers and innovators with either promising research results, ground-breaking ideas or even proof-of- concept. Focussing on data from FP7-Health and H2020-SC1 projects combined with other health related projects, UTILE facilitates finding new partnering possibilities and additional financial means to perform the next research or development step(s).

#2 BUSINESS CATALYSER for innovation DEVELOPERS

Entrepreneurs, business developers or investors within the field of life sciences, experience difficulties finding relevant research or business opportunities efficiently. With the UTILE marketplace, these actors can see their opportunities for new business or research grow. UTILE defragments research results by clustering complementary results and involves the industry in an early stage of project evaluation, making the marketplace sensitive to market demand and enabling it to match supply and demand accordingly.

The UTILE impact

UTILE impacts professionals in the Life Sciences & Health sector through:

- Development of a Marketplace, promoting EU FP7 Health and H20202 SC1 project outcomes.
- Stimulation of in- and out- licensing activity from TTOs, SMEs, and large pharmaceutical companies.
- Identification of innovative and sustainable business models of the marketplace.
- Identification and promotion of scientific discoveries and value-adding strategies.

The 'UTILE way'

Use the huge amount of data and expertise, activated by the EU-programs, through:

- evaluation of 1200 European subsidized projects
- development of an online valorisation marketplace
- sustainable innovation and business strategy
- facilitate and catalyse valorisation of innovations
- recommendations to the European Commission

What does the UTILE Marketplace offer you?

UTILE is an ideal platform for actors within the life sciences and health sector to collaborate with each other, to find clustered information, and to have an overview of promising research results that went through extensive evaluation.

Both innovation providers and developers are invited to register on the platform, and will be categorised accordingly. In daily automated runs, potentially interesting project results will be pushed to registered members with a matching profile. Research results will be clustered to ensure clear and defragmented information. The marketplace therefore acts as one-stop-shop for all types of valorisation activities, such as partnering opportunities, research opportunities, and business opportunities. The marketplace will contain additional information, such as European patents and scientific articles.

In short: the UTILE marketplace is the place for you and your valorisation activities!
